

Adoption of Artificial Intelligence: A TOP framework-based checklist for digital leaders

Aizhan Tursunbayeva, Hila Chalutz-Ben Gal, Adoption of artificial intelligence: A TOP framework-based checklist for digital leaders, Business Horizons, 2024,

In the evolving digital landscape, organizations are increasingly pressured to adopt and effectively utilize Artificial Intelligence. This research identifies the multifaceted challenges of AI adoption and introduces a Technology, Organizations, and People (TOP) framework-based checklist. Designed to guide digital leaders, this checklist helps in evaluating and addressing key considerations to enhance digital transformation success.

By systematically implementing these key dimensions, digital leaders can significantly improve their chances for successful digital transformation and competitive advantage.
