

Thapar School of Liberal Arts and Sciences (TSLAS)

Art, Cognition and Technology Center For
Transdisciplinary Research

It is our pleasure to announce the launch of the Art Cognition Technology Centre (ACT), a pioneering research hub at our esteemed Institution, an initiative under TSLAS. This innovative research centre is committed to promoting transdisciplinary collaboration, fostering cutting-edge research, and advancing the boundaries of knowledge across various Thapar schools and departments. This initiative aims to elevate Thapar's research profile and contribute to the advancement of knowledge in critical areas by producing groundbreaking studies that address the complexities of our contemporary world.

Mission and Objectives

The ACT Center envisions a future where transdisciplinary collaboration is not just encouraged but embedded in our educational and research culture.

- 1. Promote transdisciplinary cooperation**
- 2. Production of Cutting-Edge Research**
